

FOTA WILDLIFE PARK MASTER PLAN

FOTA ISLAND, IRELAND

FOTA WILDLIFE PARK

Jones & Jones developed a master plan for the renowned Fota Wildlife Park near Cork, Ireland. The expanded wildlife park will include new educational facilities and exhibits of habitats from Asia and Africa.

Planning includes improvements to the existing African Savanna, an expansive free-range area that includes giraffe, ostrich, zebra, and cheetah. Asian exhibits will consist of a completely new series of habitats on a recently acquired tract of land adjacent to the existing wildlife park. A new education center is also planned.

FACTS

- Beautiful coastal site
- 200-acre animal park
- Outstanding environmental education programs

BENEFITS

- Successful breeding programs for cheetah, zebra, giraffe, European bison
- Support for in situ conservation programs in Africa and Asia
